THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. Additional information regarding the material contained in reference report indicates the following:
 - a. Paragraphs 1 and 3 should be deleted.
 - b. The details given in paragraph 4 and the appendices are correct but refer to work carried out in the period 1 January 1947 to 31 August 1948 in TB-11.
 - c. Technisches Buero (TB 11), Berlin-Oberschoeneweide, An der Wuhlheide 228/230, Schraubenfabrik Kromarek und Knies, had the charter of reconstructing prototypes of the control gear required for the Wasserfall and Schmetterling, including ground stations. TB 11 existed from 1 January 1947 to 31 August 1948, when it was disbanded.
 - d. No further work was done in Eastern Germany on the electric-technical side of missile control systems. However, many German wartime apparatus designed for this and related purposes were left in store in Haus Gema, Berlin-Koepenick, Wendenschlossstrasse 154/158.1 In particular, there was a large number of Strassburg receivers of various marks, including type 230 V. From time to time, requests were received from the SCC to look out and pack for export to the USSR a particular piece of wartime apparatus. It is estimated by source that between 30 and 40 Strassburg receivers type 230 V, and various small components of the control system were sent to the SCC for dispatch to the USSR on various occasions between September 1948 and January 1950.

1.	<u>Comment:</u> Now called RFT Funkwerk Koepenick VEB.
